Many human activities require the use of planning

- Key problem: where does the state and goals come from
- Our solution (as in the real world): let humans tell us

OnDroad proposes an initial tourist guide according to the recommendation of the users profiles and their contacts.

A low-angle shot of a weathered metal signpost against a bright blue sky with wispy clouds. The signpost has several wooden arrows pointing in different directions, each labeled with a city name. The cities visible are RIO (top), TOKYO (top-left), PARIS (top-right), WASHINGTON (middle-left), VIENNA (middle-right), TORONTO (bottom-left), LONDON (bottom-middle), and FRANKFURT (bottom-right). A semi-transparent blue horizontal band is overlaid across the middle of the image, containing the text 'See the poster on Friday' in white.

See the poster on Friday
